

Quinn Hilger

EDUCATION

University of California, Los Angeles

Bachelor of Science in Computer Science

• **GPA:** 3.991/ 4.0

Expected June 2025

Member of Theta Chi Fraternity

WORK EXPERIENCE

Full-Stack Software Engineer Intern

Boston, Massachusetts

DraftKings

June 2024 – August 2024

- Led migration of critical marketing tool from cshtml to React, enhancing functionality with dynamic forms and filterable, searchable data table for CRUD operations
- Integrated React app with .NET Core backend, managing data flow with Tanstack Query for efficient fetching and UI updates
- Implemented live input validation and collaborated with product managers, engineers, and designers to optimize user experience, supported by Figma designs
- Wrote comprehensive unit tests using Vitest improving service reliability
- Developed robust backend APIs for partners to automate marketing content
- Engineered C# services on .NET Core, utilizing dependency injection

Software Engineer Intern

El Segundo, California

Pacific Defense

June 2023 – September 2023

- Contributed as a member of an agile development team focused on system management solutions for EW and signal intelligence applications
- Diagnosed and resolved complex networking and containerization issues during Jenkins deployments for remote developers
- Developed a dynamic deployment process using Ansible tasks and shell scripting which allowed company software to run on various machines
- Planned, developed, and implemented new testing framework which doubled the number of testing environments, eliminating deployment wait times

PROJECT EXPERIENCE

Cleverer: React Native Mobile App

- Led front-end development of React Native app for mobile and web, creating a trivia learning app and proof of concept game with automated question generation
- Implemented Firebase backend to enable shared user data and synchronization across family of apps, supporting seamless user transitions and deep link support
- Developed custom components using Typescript and Expo router for efficient file-based routing and cohesive theming
- Automated user authentication with firebase auth for streamlined login experience and enhancing user onboarding by minimizing friction
- Coordinated with engineers to plan development milestones, ensuring timely progress and alignment with investor presentation deadlines for funding opportunities

CheckMate: IOS App

- Developing an IOS app from scratch using Swift/SwiftUI frontend and Google Firebase Firestore backend
- Designed app functionality to allow users to track habit completion progress while competing with friends in their group
- Planned design of each swift view, using built-in ios functions such as Navigation View
- Planned data structures and backend storage to minimize remote reads and writes

BlockMarket: React Web Page

- Used Git version control to collaborate with four teammates to build a full stack web application, meeting weekly deadlines
- Developed front-end with React and Node.js, using functional components to represent web page data
- Used bootstrap to produce CSS for display of each web page and its data driven components.

ABOUT ME

I am a rising senior pursuing a career in software engineering, driven by a passion for solving complex problems and collaborating with talented engineers. I thrive in environments where I can continually learn and adapt to new skills and technologies. My goal is to apply my skills and dedication to contribute effectively to a team that values innovation and teamwork. I am eager to tackle challenging projects and grow alongside like-minded engineers who inspire me to elevate my technical and collaborative abilities.

INTERESTS

Solving difficult problems with others
